RIGHTS COMMITTEE (EHRC)**

**NATIONAL  
LAWYERS GUILD**  
Environmental  
Justice Committee

The Environmental Human Rights Committee (EHRC) coordinates with the existing Environmental Justice Committee and work on global climate change as well as other environmental issues world-wide.

The Environmental Justice Committee (EJC) is dedicated to providing assistance and counsel to impoverished local communities and communities of color, which are exposed to the disproportionate impacts of environmental hazards and the loss of environmental resources.

Also, NLG members work on anti-KXL protest support across the country. We have started a special email list to support Keystone work and have begun a series of nationwide Activist Lawyer Trainings [<https://www.nlg.org/nokxl-resources>] which give lawyers and legal workers new to activist representation valuable skills as they prepare to represent pipeline activists.
